

Be part of our interconnection story.

DE-CIX (German Commercial Internet Exchange) is the world's leading Internet Exchange operator and since its inception it has had a decisive influence on shaping the guiding principles of the present and future Internet in various leading global bodies. At our locations in Europe, Africa, North America, the Middle East, and Asia, we work at the heart of the Internet. For almost 30 years, our interconnection services have contributed to the creation of new digital ecosystems worldwide and have prepared people, businesses, and organizations for the coming decades of digital evolution. The DE-CIX Internet Exchange in Frankfurt (Germany) is one of the largest in the world. For more information, please visit www.de-cix.net. We are now looking for a committed person for **Frankfurt**

IT Cloud System Engineer (w/m/d)

Our Offer

- As a part of an experienced team, you will ensure maximum service availability and performance for the DE-CIX Service Connect Platform and support the continuous development of our growing services platform
- The position involves working closely with product development teams other technical platform engineering teams, requiring a broad understanding of systems and applications as well as the ability to collaborate across disciplines
- As a IT Cloud Systems Engineer you will develop a solid understanding of DE-CIX' products and processes. You will have the opportunity to apply your experience, and to use your initiative to tackle a broad range of challenges and contribute to the continuous success of DE-CIX.
- What to expect:
 - an appreciative corporate culture and trustful teamwork with like-minded specialists, as well as great working conditions (extensive personnel development measures, an occupational pension scheme, weekly language courses, a Deutschland ticket, health promotion, support on children care, eldercare, hybrid working model and many more)
 - exciting and diverse challenges in an innovative and international environment, within the framework of a crisis-resistant permanent contract with the world's market leader in its sector
 - last but not least extremely friendly and supportive colleagues

This is important to us

- Strong technical background with experience in IT hosting environments (cloud and on-prem), virtualization and storage technologies as well as Linux/UNIX systems, base infrastructure services (DNS, Mail), monitoring tools (ELK, Grafana, Zabbix) and basic networking (Ethernet, IP, Routing, Firewalling)
- Ability to automate infrastructure and daily tasks using tools such as Terraform, Ansible or Salt, as well as scripting or programming languages like Python
- Ensure stable and reliable IT services, including performance monitoring, troubleshooting, fault analysis,

service design/development (on-prem & cloud) and contributing to platform automation

Clear communicator, self-motivated, able to work independently, eager to share knowledge, contribute ideas and continuously develop skills, and open to participate in a 24x7 on-call rotation
