

Be part of our interconnection story.

DE-CIX (German Commercial Internet Exchange) is the world's leading Internet Exchange operator and since its inception it has had a decisive influence on shaping the guiding principles of the present and future Internet in various leading global bodies. At our locations in Europe, Africa, North America, the Middle East, and Asia, we work at the heart of the Internet. For almost 30 years, our interconnection services have contributed to the creation of new digital ecosystems worldwide and have prepared people, businesses, and organizations for the coming decades of digital evolution. The DE-CIX Internet Exchange in Frankfurt (Germany) is one of the largest in the world. For more information, please visit www.de-cix.net. We are now looking for a committed person for **Frankfurt**

Lead Engineer for Cloud Services (w/m/d)

Our Offer

At DE-CIX, we are a team of highly skilled professionals that manages the biggest Internet Exchange in the world. Our fast-growing platform is distributed across the globe and can be connected from over 450 cities in more than 100 countries.

The Product Technology area develops and maintains the applications to manage DE-CIX products globally. Within that area, the Cloud Services Team is responsible for all DE-CIX cloud connectivity-related services (like DirectCLOUD or DE-CIX Cloud ROUTER) offered to customers at our Internet or Cloud Exchange Points.

The lead engineer is responsible for both technical and people leadership, within the Cloud Services team.

- What to expect:
 - an appreciative corporate culture and trustful teamwork with like-minded specialists, as well as great working conditions (extensive personnel development measures, an occupational pension scheme, weekly language courses, a Deutschland ticket, health promotion, support on children care, eldercare, hybrid working model and many more)
 - exciting and diverse challenges in an innovative and international environment, within the framework of a crisis-resistant permanent contract with the world's market leader in its sector
 - last but not least extremely friendly and supportive colleagues

This is important to us

- 3-5 years in agile leadership or senior technical roles with a track record of managing complex projects and leading cross-functional teams, supported by strong communication, coaching, and team-building skills.
- Solid engineering background with experience in DevOps (CI/CD, monitoring), Linux/Docker/Kubernetes, automation using Python/PHP/Go, as well as practical knowledge of SQL/ORM, REST APIs, and clean-code principles (SOLID, DRY, KISS), including event-driven architectures.

- Familiarity with Infrastructure-as-Code tools (Terraform, Ansible), cloud networking (AWS/Azure/GCP), and key routing and switching protocols such as BGP, OSPF, and VLANs.

Even more important to us than your professional qualifications are your passion for the technical possibilities of automation, your commitment to lifelong learning, and your strong sense of teamwork. Your mindset is guided by the question: "How is my team doing today, and what can I do to help them perform even better?"
